

Kirtiman Bhagawati

Software Engineer

Summary

I am a driven and determined Software Engineer working as a back-end Java Developer, promoting 3 years of experience in designing, coding, and maintaining Java applications. Proficient in the full software development lifecycle, from concept to deployment. Strong grasp of object-oriented programming, design patterns, and agile methodologies. Ready to contribute expertise to drive impactful projects and deliver exceptional results.

Skills

- Java (Core and EE)
- Spring MVC
- SpringBoot
- Oracle SQL
- Rest API
- Linux
- CSS
- HTML
- XML
- Hibernate
- Python

Experience

SOFTWARE ENGINEER 10/2021- Current
Netcracker Technology, Bangalore, India

- Implemented the Product Offering Catalog(POC) component for O2UK based on the business requirements by working within an agile scrum team.
- Developed various custom APIs for POC, which were used by Order Entry(OE) component.
- Developed new functionalities to handle each new characteristic of offerings introduced by O2UK as part of their new products using Spring framework and Java.
- Developed various client specific custom functionalities within the product for improving the billing experience in RBM end using Spring framework and Java.
- Developed new and well-tested data import validations using Hibernate and SQL.
- Responsible for preparing appropriate SQL import scripts for importing data collected from BA.
- Customized the Catalog Loader Tool to support the new characteristics introduced by O2UK using Java and Spring framework.
- Consistently delivered weekly builds on time and within budget for various sprints of O2UK such as paym3, cvp2, pobo, mw15, r4.01 and r4.023.
- Optimized Java and SQL code, resulting in an increased installation speed of the builds.
- Responsible for fixing various bugs in the project using Spring framework, Hibernate and Java.

JUNIOR SOFTWARE ENGINEER 11/2020 - 09/2021
Netcracker Technology, Bangalore, India

- Implemented the Product Offering Catalog(POC) component for ER Telecom and O2UK based on the business requirements by working within an agile scrum team.
